

UK Heart Failure with Preserved Ejection Fraction Registry (UK HFpEF)

The aim of this study is to improve the quality of life and outcomes of patients with heart failure with preserved ejection fraction.

Living with HFpEF (a form of heart failure)?

Explore how you may improve your quality of life.

What does the study involve?

- Giving a blood sample.
- Completing a questionnaire.
- Agreeing that your past and future medical, health, and social care information can be collected and used for research.

You may also be asked to:

- Do a walk test.
- Have an additional 5 minutes of scanning if you are already having an MRI scan.

Are you interested?

If you are interested in taking part, or would like further information, please speak with your heart failure team
